RANGGA DEWA YUDHISTIRA

Jakarta, Indonesia | 08998915960 | ranggadewa853@gmail.com
LinkedIn | GitHub | Portfolio

Professional Summary

Informatics graduate from Universitas Nasional with a strong interest in DevOps engineering and software development. Familiar with Linux, Git, GitHub, and Docker, with experience applying these technologies through personal projects. Has a foundational understanding of CI/CD practices and containerization, with a strong willingness to learn new technologies and continuously develop technical skills. Adaptable, quick to learn, and able to collaborate effectively in a team.

Education

Universitas Nasional Jakarta, Indonesia
S1 Informatika 2022 - 2026
GPA: 3.85 / 4.00

Work Experience

IT Intern Apr – Jul 2025
Badan Pengawasan Keuangan dan Pembangunan (BPKP) Jakarta, Indonesia

- Worked in a Linux environment and accessed the internship server remotely via SSH
- Created and executed GitLab CI/CD pipelines by configuring .gitlab-ci.yml, with AI-assisted code development.
- Learned fundamental application security concepts, including SAST and DAST, and explored DVWA as an introduction to web application security testing.
- Installed Sentry and explored its dashboard for application monitoring

Projects

Wade Convert | Personal Project Sept 2026 – Present
Next.js, FastAPI, Docker, GitHub Actions, Trivy, GHCR

- Developed a web-based file conversion application using Next.js and FastAPI with AI-assisted development.
- Ran the application locally using Docker Desktop.
- Worked with GitHub Actions workflows to automate linting, testing, and application builds.
- Configured automated Docker image builds and publishing to GitHub Container Registry (GHCR).
- Configured Trivy vulnerability scanning for API and web Docker images, focusing on HIGH and CRITICAL severity vulnerabilities.

AIS Anomaly Detection | Academic Research Project May – Jul 2026
Python, TensorFlow, Scikit-learn, Pandas, Streamlit, LSTM-Autoencoder, LOF

- Worked on an AIS based maritime trajectory anomaly detection research project using a hybrid LSTM-Autoencoder and Local Outlier Factor (LOF) approach.
- Explored the end-to-end workflow, including AIS data preprocessing, model development, anomaly detection, and result visualization.
- Contributed to the development of an adaptive threshold approach for identifying anomalous vessel trajectories.
- Presented the research at the 12th International Conference on Smart Computing and Communication (ICSCC 2026).

Certifications & Achievements

Information Technology Specialist Cybersecurity

- Issuing Organization: Certiport (Pearson VUE)
- Score: 1000/1000
- Issued: May 2026
- Valid Until: May 2031

Pengembang Web Pratama (Junior Web Developer)

- Issuing Organization: LSP Informatika – BNSP
- Issued: September 2026
- Valid Until: September 2029

Best Graduate | Third Place, Informatics Study Program

- Universitas Nasional, Faculty of Information Technology
- Academic Year: 2025/2026
- Awarded: October 2026
- GPA: 3.85

Best Paper Award | ICSCC 2026 (Author & Presenter)

- 12th International Conference on Smart Computing and Communication | July 2026
- Research title: A Hybrid Spatiotemporal Ensemble of LSTM-Autoencoder and LOF for Maritime Trajectory Anomaly Detection
- Presented the research and participated in the conference's Q&A session.

Skills

- DevOps & CI/CD: GitHub Actions, GitLab CI/CD, Docker (Basic), GitHub Container Registry (GHCR)
- Operating Systems & Tools: Linux, SSH, Git, GitHub
- Programming & Frameworks: Python, Next.js, FastAPI
- Data & Machine Learning: TensorFlow, Scikit-learn, Pandas, Streamlit
- Languages: Indonesian (Native), English (Intermediate)
